DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi et al. (USPN 6,234,601) in view of Ueda et al. (USPN 5,968,244).

With respect to claim, Hayashi et al. disclose the liquid for ink printer comprising a colorant (Column 3: line 10-11), water (Column 3: line 33), a fine particle of non-photo-curable resin (Column 5: line 65-67, Column 7: line 2-6) and a fine particle of photo-curable resin (Column 6: line 67, Column 7: line 1-2).

With respect to claim 2, Hayashi et al. disclose the method for recording images on a recording medium by discharging the droplets of the recording liquid from a recording head (Column 12: line 11-13, line 34-35).

However, Hayashi et al. fails to teach the total solids content of the resin particles ranges from 15 to 90% by weight.

Ueda et al. teach the total solids content of the resin particles ranges from 1 to 20% by weight (Column 4: line 22-24).

It would have been obvious to one having skill in the art the time the invention was made with the total solids content of the resin particles ranges from 1 to 20% by

weight as taught by Ueda et al. The motivation of doing so is in order to capable of producing images and having excellent glossiness and fixing characteristics (Ueda USPN 5,268,244, Column 2, line 11-16).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Karkov (USPN 3,925,096) discloses the pigment contents amount to 70% or more of the total weight of resin and pigment (Column 5: line 45-50).
